

KASAMA 3-MINUTE DEMO

Read this sheet. Do not improvise. Typed fallback is the same line.

Script issue-12. Rules-based copy (KASAMA_DEMO=1). Uber is the controlled provider.

SETUP (BEFORE JUDGES SIT DOWN) (~20s)

EXPECT: API on port 3001. KASAMA_DEMO=1. Reset the iOS default session to live-demo so the ride is not already booked. Senior mode on the demo phone. Optional second phone already on Caretaker.

IF IT FAILS: If Expo cannot reach the API, stop. Do not improvise with a stale session.

INTRODUCE MARIA (~20s)

POINT: Presenter: This is Maria. She has a checkup with Dr. Chen tomorrow at 10:30. Do not open Chat yet. Stay on Senior Home.

ASK FOR THE RIDE (~40s)

SAY OR TYPE: Please get me a ride to my doctor tomorrow.

EXPECT: Kasama names Dr. Chen, tomorrow, 10:30, and a pickup around 10:15. Two large Uber cards: UberX \$18.00 and Wheelchair Uber \$24.50. Screen may say Finding Ubers.

IF IT FAILS: Mic denied, STT missing, or a missed transcript: type the same line. Do not rephrase.

CHOOSE THE ACCESSIBLE UBER (~25s)

SAY OR TYPE: Choose the accessible one.

TAP: Wheelchair Uber card (\$24.50)

EXPECT: The Uber is \$24.50. Should I book it?

IF IT FAILS: Type: Choose the accessible one.

HUMAN YES - THEN BOOK (~25s)

SAY OR TYPE: Yes

TAP: Confirm

EXPECT: Kasama books the wheelchair Uber for \$24.50 and reads a confirmation id (UBER-WAV-0001 after a live-demo reset). Nothing is charged until this yes.

IF IT FAILS: Type Yes, or tap Confirm. If booking fails, tap Confirm again - do not pretend it booked.

CARETAKER MODE (~40s)

TAP: Home Dev -> Caretaker (or the second iPhone already on Caretaker)

EXPECT: Appointment, wheelchair ride, timestamp, consent, CONFIRMED. Care notes: worth reviewing, 15-minute lead, no diagnosis.

POINT: Tap Care notes. Point at repeated questions or less sleep than usual. Say this is worth reviewing. Never a diagnosis.

IF IT FAILS: If the ride is still the seeded UBER-WAV-SEED booking, the session was not reset. Stop and reset to live-demo.

DO NOT

Do not skip Confirm. Do not let ChatGPT plan (KASAMA_DEMO=1). Do not diagnose. Do not book twice. If Confirm stays on screen, the send/book failed - retry, do not claim success.

Time budget is 170 seconds. Leave a few seconds of silence between beats so Kasama can finish speaking.
